October 26, 2009

Fife, Washington – Flex-a-lite introduces a Shrouded Heavy Duty Remote Oil Cooler #45265. Perfect for applications with insufficient ram air, or where positioning an additional cooler in front of other radiators would compromise the cooling performance. The fully shrouded remote unit runs on 12V, is thermostatically controlled, draws 7 amps and pulls 850 cubic feet per minute. The fan shroud maximizes the cooling surface area and provides additional protection for both the fan blade and cooler. All units include Flex-a-lite's GatorClip® mounting brackets for stand-off assembly to any hard surface area.

The heavy duty remote cooler is manufactured and tested up to 300 PSI in the USA, and features 5/8" copper tubes for higher heat transfer with high efficiency turbulators. This unit is rated for 26,000 GVW, and comes from the manufacturer with 1/2" female NPT fittings and mounting hardware.

Flex-a-lite products are made in the United States and are backed by a full year warranty. For more information, on Flex-a-lite's Heavy Duty Coolers, contact Flex-a-lite, 7213 45th St. Ct. East Fife WA 98424, (800) 851-1510/ or visit them on the web at www.flex-a-lite.com.
