October 26, 2009

Fife, Washington –Cool down your Ford Coupe 1930'-34' by using Flex-a-lite's all new aluminum shrouded electric fan. This unit acts as a large louver by shrouding the electric fan; this will increase airflow efficiency over entire area of the core. The low profile design of #318 allows this unit to also fit easily in tight engine compartments.

Flex-a-lite's fan system #318 creates 2500 CFM of air-flow that can instantly bring down the temperature of your coolant, without drawing power from the engine. This fan unit measures 17 5/8" x 22 1/4" x 4 3/8" and comes equipped with Flex-a-lite's electronic control unit that constantly measures coolant temperature and air conditioning use. Adjustable temperature range is between 160 to 240 degrees. Part #328 comes without controls.

All of Flex-A-Lite's products are made in the U.S. from the highest quality materials and are an excellent method for improving horsepower, torque and fuel economy on passenger cars, full size trucks and SUVs. For more information, contact **Flex-A-Lite, 7213 45th St. Ct. East Fife WA 98424, (800) 851-1510**. Or visit them on the web at www.flex-a-lite.com.
